

MEHRAJ HOSEN

Full-Stack Web Developer — MERN, PERN & System Design (HLD)

Dhaka, Bangladesh | meherajhosen786@gmail.com | +880 1989162543 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

SUMMARY

Full-stack developer with hands-on experience building and shipping scalable real-world web applications for clients in Bangladesh and early-stage startups. I specialize in Next.js and Node.js, with experience across Express, Prisma, MongoDB, and PostgreSQL. From designing the frontend and backend to building APIs, structuring databases, integrating AI-powered features, and deploying production applications, I'm comfortable taking ownership of the full development process. I focus on writing maintainable code, understanding the problem behind the requirements, and delivering products that are reliable, practical, and ready for real users.

TECHNICAL SKILLS

Frontend: Next.js, React.js, TypeScript, JavaScript, Tailwind CSS, Redux, TanStack Query

Backend: Node.js, Express.js, NestJS, Prisma ORM, JWT Auth, Zod, REST APIs, Socket.io

Databases: MongoDB, PostgreSQL, MySQL, Redis

Tools & Platforms: Docker, Git, GitHub Actions, Postman, Nginx, Linux, RabbitMQ

PROJECTS

Multipurpose Inventory & Business Management System — [Github Link](#) / [Live Link](#)

- Designed a unified data model that supports retail, restaurant, and service-based businesses in one system, using separate Product, Raw Product, Prepared Product, and Service modules joined at the transaction level.
- Built automatic raw-material deduction when a prepared product is produced, plus wastage reporting, stock adjustments, and widget-based stock-in tracking.
- Implemented sales, purchases, invoicing, returns,

Stack: Next.js, React Hook Form, Zod, Shadcn UI, Express.js, Prisma, PostgreSQL (Neon).

Single-Vendor E-Commerce Platform — Microservices Architecture — [Github Link](#) / [Live Link](#)

- Architected a niche-agnostic commerce engine as independent services (API gateway, user, product, cart, inventory, order) behind an API Gateway for independent scaling and deployment.
- Used Redis for cart/session state to keep checkout fast and avoid unnecessary database writes; containerized all services with Docker Compose for reproducible environments.

Stack: Node.js, NestJS, TypeScript, PostgreSQL, MongoDB, Redis, Next.js, Tailwind CSS.

About Dhaka — City Discovery Platform — [Github Link](#) / [Live Link](#)

- A modern city discovery and digital directory platform for Dhaka.
- Built an AI assistant page with Groq-powered intent classification that answers natural-language queries (hospitals, restaurants, doctors) using MongoDB queries across multiple data categories.
- Delivered a full admin dashboard (CRUD for hospitals, doctors, restaurants, shops, blogs, bus data) and a bus/transit route lookup tool;

Stack: Next.js, TypeScript, MongoDB, TanStack Query, Leaflet.

FREELANCE EXPERIENCE

Full-Stack Developer (Freelance)

Built and delivered full-stack web applications for clients across Bangladesh, using Next.js, Node.js, and modern web technologies. Contributed to feature development, UI implementation, and product improvements for several small, early-stage startups, working directly with clients, founders, and lean development teams.

EDUCATION & TRAINING

Diploma in MERN Stack Development — Creative IT Institute, 2025–2026

System Design: Theory to Implementation — Interactive Cares, 2026
